

you can't put the squeeze
on SEALDTITE
CAPACITORS

Just try it . . . Take a genuine "Sealdtite" capacitor and try to *squeeze* it. No results. You'll find it has no soft spots, which in ordinary tubulars provide room for moisture, the capacitor's worst enemy, because the Solar capacitor has an internal winding of high quality paper and foil, skillfully *molded* into *solid* plastic.

No moisture can penetrate this protective case and its substantial construction permits rough handling, assures long and *reliable* service.

Use "Sealdtite" capacitors. Send for your copy of Catalog V-4. Any Climate—Any Atmosphere—Any Service.

BAYONNE PLANT
WEST N.Y. PLANT

Two small, stylized flags are positioned on either side of the text, one above 'BAYONNE PLANT' and one above 'WEST N.Y. PLANT'.
