

STANCOR OFFERS YOU THESE OUTSTANDING VALUES

• FOR THE HAM: **20P** **TRANSMITTER KIT**

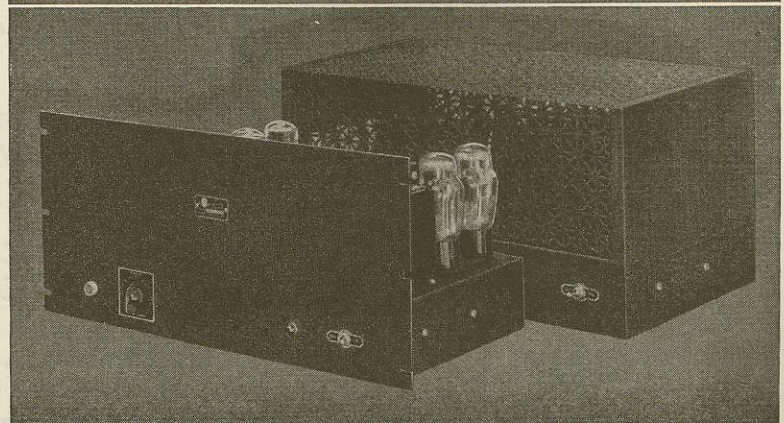

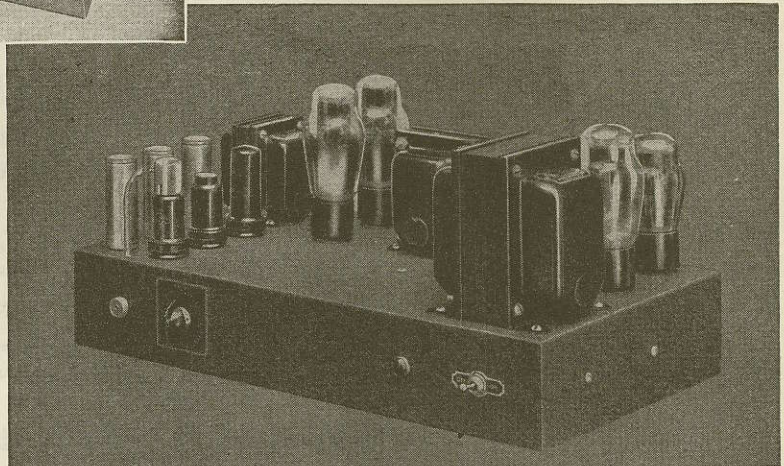

Designed to meet the demand for an economical unit, this complete phone and C.W. transmitter includes A.C. power supply in a cabinet 19"x13"x8 3/4". It operates on any frequency from 1.6 to 60MC and is crystal controlled. The R.F.: 6F6-G crystal oscillator drives an 807 amplifier. Split-stator condensers in oscillator and amplifier circuits insure proper L-C ratio. The speech amplifier and modulator: 6J7 input, 6C5 voltage amplifier, 6N7 driver (Class "A"), and 6N7 modulator (Class "B"). Sufficient gain for any crystal microphone or high impedance input. Complete kit may be bought with tubes, crystal, holder, meter and cabinet for **\$52.50** NET approximately

• FOR THE HAM AND SERVICEMAN: **F415** UNIVERSAL **SPEECH AMPLIFIER KIT**

Designed as a universal amplifier for rack and panel or table type mounting. It can be used with any high impedance low level input. Standard output impedances of 4, 8, 15 and 500 ohms. Output transformer is replaceable with driver or modulation transformer so that the amplifier can be used to drive a high powered modulator; or, become low power modulator delivering 15 watts. Tube lineup: 6J7 input, 6C5 voltage amplifier, 6N7 driver (Class "A"), and P.P. 2A3's (Class "AB"). A 5Z3 full-wave rectifier is used plus an 80 as a half-wave bias rectifier, supplying fixed bias for the P.P. 2A3's. Complete kit with F415 chassis and tubes—approximately

\$30.00 NET
